UNFAVORABLE COMMENT ON COPPER SITUATION.

New York, July 18 .- There was demonstrated the inadequacy of any present demand for stocks to absorb considerable offerings for sale. Prices yielded easily to a recurrence of sciling pressure, the withholding of which was largely responsible for the show of negative strength in last week's

ket came into view in the latter part West. Electric ... of the day when it became plain that it was bare of offerings again, so that the W. & L. E. was bare of offerings again, so that the uncovered bears had to bid to secure stocks. The professional character of such dealings as there was indicated by the heavy congestion of the day's transaction in three or four stocks. Losses were generally recovered before the day was over, and there were not a few gains to be found.

There was much discussion of the trade position in the leading metal industries, and this was held responsible trade position in the leading metal industries, and this was held responsible for much of the weakness shown by stocks. The copper industry, especially, was the subject of unfavorable comment. The large stocks of copper on hand are believed to have played some part in the credit position of the banks and to be the object of pressure, in that way, from the directors of larger banking and financial affairs. The reports of a scaling down of prices of steel products added to the feeling of uneasiness over the metal trade position. Cutting by independents was believed to threaten reprisals by the leading interest, which might throw the situation into confusion again such as accompanied the throwing open of the market in February of 1909.

The dispute between the Pennsylvania railroad and its employes was tor two considered in connection with product. Lack 12.54 tons at \$2.95 to choice maining, 69.676c.

the situation into confusion again such as accompanied the throwing open of the market in February of 1999.

The dispute between the Pennsylvania rallroad and its employes was not much considered in connection with the early weakness of stocks, but the reports of good prospect for settlement had an influence in the later recovery. The strong banking position disclosed The strong banking position disclosed by the Saturday bank statement de-tracted from the importance of the tracted from the importance of the money market as an increase. The material addition to last week's cash holdings has been greatly added to already by the heavy disbursements from the sub-treasury on account of government payments. Last week's shipments of gold from London will figure in next Saturday's bank statements, and today's engagement of all the \$3,000,000 of gold offering in London promises an extension of the movement.
